## SKILLS

---

- **Languages:** JavaScript, C#, Java, Dart
- **Frontend:** React, Flutter, Tailwind CSS, HTML, CSS
- **Backend:** Node.js, Express.js, Java Servlet, JSP
- **Databases:** MySQL, MongoDB
- **ORM:** Hibernate, JPA
- **Tools:** Git, GitHub, Docker, Postman
- **Core Concepts:** OOPs, MVC Architecture, REST APIs

## ACADEMICS PROJECTS

---

### **MediTrack – Medication Reminder App**

A Flutter-based mobile app for managing medication schedules with offline-first SQLite storage and local notifications for timely dose reminders, improving medication adherence and reliability.

### **PropEase – Online Property Rental and Buying System**

A web-based application developed to simplify property renting and buying by allowing users to search, list, and manage properties efficiently. The system uses Servlets and JSP for dynamic content handling, user authentication, and property management –MySQL, Java, Servlet, JSP, HTML, CSS.

### **Healthcare Portal**

A console-based healthcare management application designed to manage patient records, doctor details, appointments, and medical histories efficiently, supporting both admin and patient workflows using ORM-based persistence – Java, Hibernate ORM, MySQL.

## EXPERIENCE

---

### **Web Developer Intern - Zeptac Technology - Pen, Maharashtra**

**July - Oct 2025**

Worked on developing and enhancing web applications by implementing responsive frontend designs and integrating backend functionalities. Contributed to full-stack development using HTML, CSS, JavaScript, React, PHP, MySQL, and assisted in debugging, testing, and optimizing web features for performance and usability.

## EDUCATION

---

### **BSC (Computer Science) - Mumbai University (2023-26)**

Pillai College of Art's, Science, & Commerce

**CGPA - 9.58**
